

Hidar Abo Karaa

Full-Stack Developer (Laravel / PHP) • Information Systems Engineer

Damascus, Syria | +963 988 797 331 | hidarabokaraa27@gmail.com | hidarabokaraa.github.io | github.com/Hidarabokaraa

PROFESSIONAL SUMMARY

Full-stack Laravel developer and Information Systems Engineering graduate (2026) who builds production software for the logistics industry. Designed and shipped a financial collections system running two shipping companies, a shipping and customs clearance platform with live GPS tracking, and bilingual corporate websites. Backed by five years in sales and marketing management at freight and customs clearance companies, turning real operational workflows into reliable, well-tested systems.

TECHNICAL SKILLS

Backend: PHP 8.2, Laravel 11/12, Livewire 3, Eloquent ORM, RESTful APIs, MVC, Authentication & Role-Based Authorization
Frontend: JavaScript, HTML5, CSS3, Blade, Tailwind CSS, Bootstrap 5, GSAP, Canvas, Leaflet.js, Arabic RTL & Bilingual UI
Databases: MySQL, MariaDB, SQL Server, SQLite, Schema Design & Normalization, Migrations
Engineering: OOP (PHP, Java), Automated Testing (PHPUnit), CI with GitHub Actions, Git, Composer, Docker (basics)
Languages: Arabic (Native), English (Fluent) • **Currently learning:** Python

PROJECTS

Free Line Collections — Receivables & Cash Management System Live demo

Laravel 12 • PHP 8.2 • Livewire 3 • Tailwind CSS 4 • MariaDB • PHPUnit • GitHub Actions

- Built the internal Arabic (RTL) system that runs receivables, collections, collector custody and the daily cash box for two shipping companies.
- Kept USD and SYP as strictly separate ledgers with exact bcmath arithmetic, an immutable audit log and no hard deletes of financial records.
- Delivered Excel and PDF reporting, verified backup and restore commands, CI on every push and full deployment documentation.

Shipping & Customs Clearance Management System Laravel 11

Laravel 11 • PHP 8.2 • MySQL • Blade • Bootstrap 5 • Leaflet.js • REST API

- Built a complete platform for a shipping and customs clearance company, with live GPS shipment tracking on Leaflet.js maps fed by a dedicated API endpoint.
- Implemented role-based authorization, Eloquent models, seeders and controllers across a phased delivery plan.

Free Line — Corporate Website Live site • Source

JavaScript • Canvas • GSAP • ScrollTrigger • HTML5 • CSS3

- Arabic RTL, fully responsive site with an interactive Canvas globe animating shipping routes into Syria, scroll-driven scenes and a WhatsApp quote form.

Levantix — Bilingual Corporate Website Live site • Source

JavaScript • HTML5 • CSS3 • SEO • Accessibility

- English and Arabic site with a serverless WhatsApp quote form; cut image weight from 18 MB to about 50 KB and added structured data for SEO.

PROFESSIONAL EXPERIENCE

Sales Manager — Free Line, Shipping & Customs Clearance 2023 – 2026

- Led sales of freight and customs clearance services and managed a portfolio of import and export clients.
- Negotiated shipping rates and service terms, coordinating with operations to deliver shipments on schedule.

Marketing Manager — Free Line, Shipping & Customs Clearance 2022 – 2023

- Directed marketing strategy, brand positioning and campaigns, producing digital content that fed the B2B sales pipeline.

Marketing Manager — Apex Swift, International Logistics & Shipping 2021 – 2022

- Led marketing for trade routes from China, UAE and Turkey to Syria, including brand identity, campaigns and AI-assisted visual content.

EDUCATION

B.Sc. Information Systems Engineering — Syrian Private University, Damascus 2026

Relevant coursework: Web Development, Software Engineering, Database Systems, Object-Oriented Programming, Algorithms, System Analysis & Design.
