Portfolio: hidarabokaraa.github.io

PROFILE

I build software that businesses run on, end to end: data model, business rules, interface, tests and deployment. A system I designed now handles the **daily receivables and cash of two shipping companies**, backed by **370+ automated tests** and CI. Five years leading **sales and marketing in freight and customs clearance** taught me the operation before I ever modelled it.

SKILLS

Languages	PHP 8, JavaScript, TypeScript, SQL, Java, HTML & CSS · Arabic (native), English (fluent)
Back end	Laravel 11/12, Livewire 3, Eloquent, Next.js, Prisma, REST APIs, JWT auth, role-based access
Front end	React 19, Blade, Alpine.js, Tailwind CSS, GSAP, Canvas 2D, Leaflet.js, Arabic RTL & bilingual UI
Data & delivery	MySQL, MariaDB, SQL Server, SQLite, Pest/PHPUnit, GitHub Actions, Git, Nginx, Docker basics

SELECTED PROJECTS

Free Line Collections · *treasury system* · In production · [Live demo](#)

Laravel 12 · Livewire 3 · MariaDB · Pest · CI

- Built the Arabic (RTL) system that runs receivables, field collections, collector custody and **three daily cash boxes for two companies in two time zones**, with admin, accounting and collector roles.
- Modelled money for correctness: USD and SYP as separate ledgers, exact **bcmath** arithmetic instead of floats, handover, settlement and cash entry written **1:1:1 in one transaction**, no hard deletes, immutable audit log.
- Spreadsheet import with a pre-import analysis step and row-level history, customer statements, Excel and PDF reports.
- Shipped with **370+ automated tests**, CI running tests, code style and build on every push, verified backup and restore commands, and full deployment runbooks.

NASH Artisanal Bakery · *online ordering & store admin*

Laravel 12 · Tailwind 4 · Alpine.js · MySQL

- Online ordering for a Damascus bakery: menu with sizes and add-ons, cart, checkout, order tracking with status history, reviews and a live “open now” badge from business hours.
- Owner dashboard for products, orders, banners and site images with no developer needed; prices stored as decimals, idempotent seeders, **100+ feature tests**.

Free Line · *company website* · [Live](#)

JavaScript · Canvas 2D · GSAP · Lenis

- Arabic RTL site with a **hand-coded Canvas globe** animating shipping routes into Syria from real map data, pinned scroll scenes for each service, and a quote form that previews the WhatsApp message; respects reduced motion.

Levantix · *bilingual company website* · [Live](#)

HTML · CSS · JavaScript · SEO

- English and Arabic site with a full RTL switch, a serverless WhatsApp quote form, accessibility built in and structured data for search; cut image weight from **18 MB to 50 KB**.

EXPERIENCE

Free Line · *Shipping & Customs Clearance, Damascus*

2022 – 2026

- **Sales Manager** (2023–2026): led freight and customs clearance sales, managed import and export clients, negotiated rates and coordinated delivery with operations. Built the company’s collections system and website.
- **Marketing Manager** (2022–2023): ran brand positioning, campaigns and digital content feeding the B2B sales pipeline.

Marketing Manager · *Apex Swift, International Logistics & Shipping*

2021 – 2022

- Led marketing for trade routes from China, the UAE and Turkey to Syria: brand identity, campaigns and visual content.

EDUCATION

B.Sc. Information Systems Engineering · *Syrian Private University, Damascus*

2026

Coursework: Software Engineering, Database Systems, Web Development, OOP, Algorithms, Systems Analysis & Design
