PROFILE

I build software that businesses run on, end to end: data model, business rules, interface, tests and deployment. A system I designed now handles the **daily receivables and cash of two shipping companies**, backed by **370+ automated tests** and CI. Five years leading **sales and marketing in freight and customs clearance** taught me the operation before I ever modelled it.

SKILLS

Languages	PHP 8, JavaScript, TypeScript, SQL, Java, HTML & CSS · Arabic (native), English (fluent)
Back end	Laravel 11/12, Livewire 3, Eloquent, Next.js, Prisma, REST APIs, JWT auth, role-based access control
Front end	React 19, Blade, Alpine.js, Tailwind CSS, GSAP, Canvas 2D, Leaflet.js, Arabic RTL & bilingual UI
Data & delivery	MySQL, MariaDB, SQL Server, SQLite, Pest/PHPUnit, GitHub Actions, Git, Nginx, Docker basics

SELECTED PROJECTS

Free Line Collections · *treasury & collections system*

Laravel 12 · Livewire 3 · Tailwind 4 · MariaDB · Pest · CI

- Built the Arabic (RTL) system that runs receivables, field collections, collector custody and **three daily cash boxes for two companies in two time zones**, with admin, accounting and collector roles. In production · [Live demo](#)
- Modelled money for correctness: USD and SYP as separate ledgers, exact **bcmath** arithmetic instead of floats, handover, settlement and cash entry written **1:1:1 in one transaction**, no hard deletes, immutable audit log.
- Spreadsheet import with pre-import analysis, customer statements, Excel/PDF reports; **370+ tests**, CI on every push, verified backup/restore and deployment runbooks.

Shipping & Customs Platform · *multi-portal operations system*

Laravel 12 · MySQL · Blade · Leaflet.js · REST API

- Portals for admins, employees, customers and drivers: shipments, invoices, payments, carriers, ports, delivery zones, customs tariffs and exchange rates (**25 models, 80+ routes**).
- Live GPS shipment tracking** on Leaflet maps fed by a dedicated device API, plus a store integration API, status history and support tickets.

QCARGO · *shipping website & admin panel*

Next.js 15 · React 19 · TypeScript · Prisma · Zod

- Bilingual site with tracking, cost calculator, quote requests with attachments, blog and SEO; admin panel behind **JWT sessions checked in Next.js middleware** on a 15-model Prisma schema.

NASH Artisanal Bakery · *online ordering & store admin*

Laravel 12 · Tailwind 4 · Alpine.js · MySQL

- Menu with sizes and add-ons, cart, checkout, order tracking and live opening hours; owner dashboard for products, orders and site images; **100+ feature tests**.

Free Line · [Live](#)

Arabic RTL company site with a hand-coded Canvas globe animating shipping routes into Syria and a WhatsApp quote flow.

Levantix · [Live](#)

Bilingual EN/AR site, no framework or backend, accessible, image weight cut from **18 MB to 50 KB**.

Portfolio · [Live](#)

Layered parallax portfolio with GSAP ScrollTrigger, light and dark themes and a live systems demo.

EXPERIENCE

Free Line · *Shipping & Customs Clearance, Damascus*

2022 – 2026

- Sales Manager** (2023–2026): led freight and customs clearance sales, managed import and export clients, negotiated rates and coordinated delivery with operations. Built the company's collections system and website.
- Marketing Manager** (2022–2023): ran brand positioning, campaigns and digital content feeding the B2B sales pipeline.

Marketing Manager · *Apex Swift, International Logistics & Shipping*

2021 – 2022

- Led marketing for trade routes from China, the UAE and Turkey to Syria: brand identity, campaigns and visual content.

EDUCATION

B.Sc. Information Systems Engineering · *Syrian Private University, Damascus*

2026

Coursework: Software Engineering, Database Systems, Web Development, OOP, Algorithms, Systems Analysis & Design
